THE HALE IS THE CASE

WITH

An Upper Shelf to Protect the Books  
A Sliding Reference Shelf  
A Noiseless Door  
A Perfect Working Door  
An Air Tight and Dust Proof Case  
A Removable Door

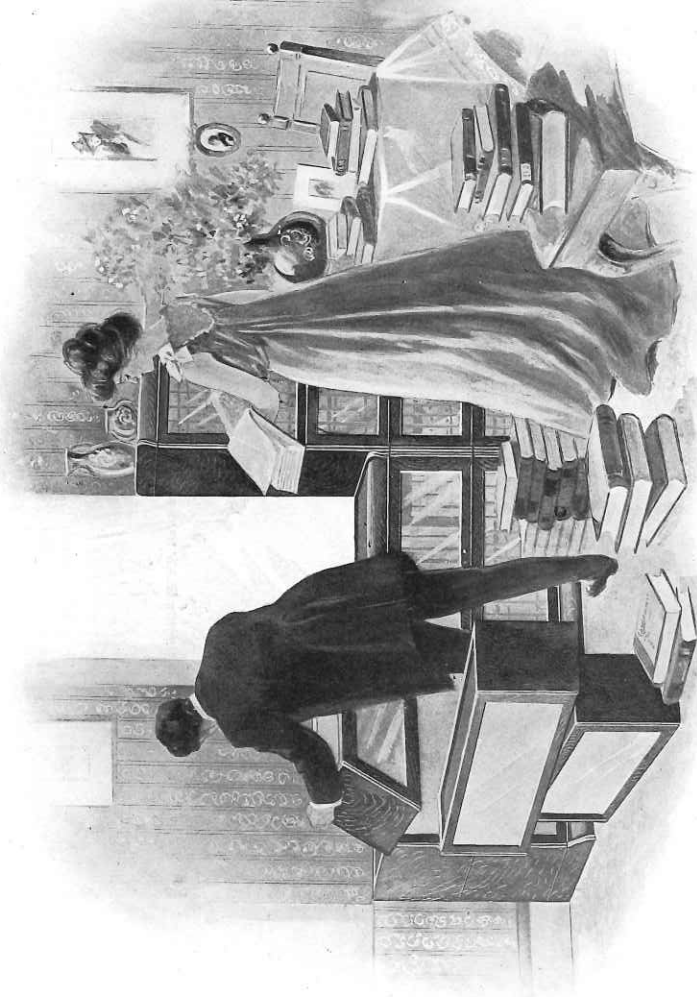

*Catalogue No. 47*

*In Effect April 1st, 1907*

---

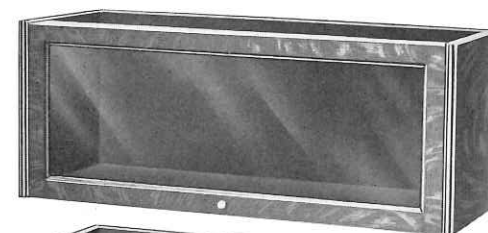

Camden Cabinet Co.  
CAMDEN, NEW YORK, U. S. A.

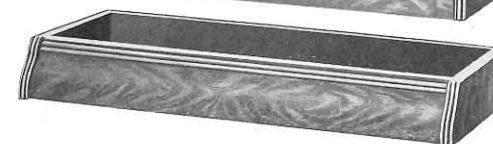

This crown,

This book section,

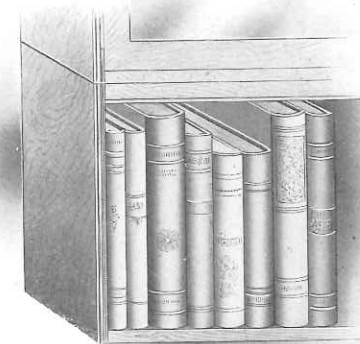

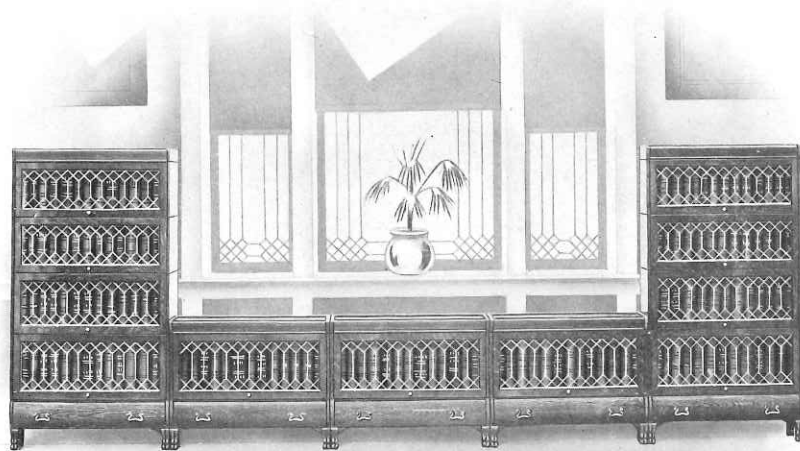

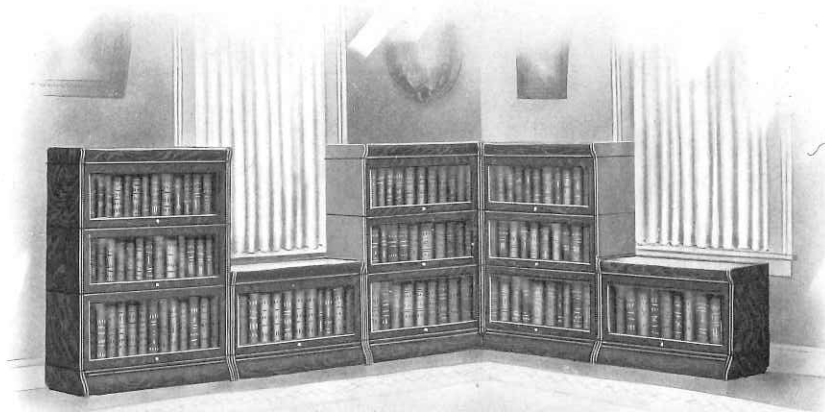

This base

Make a complete bookcase.

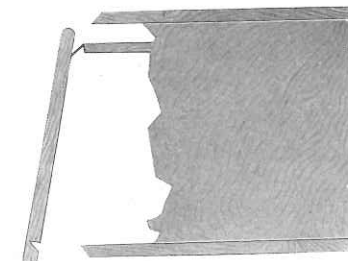

The Hale Sectional Bookcase is made in all grades from the finest mahogany and quartered oak with bird's-eye interior for the home, to the inexpensive plain oak and doorless case for the office. The absence of all metal bands, protruding shelves and visible locks gives a richness of appearance unequalled by any other make.

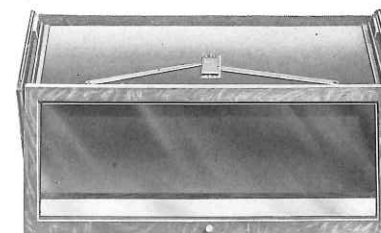

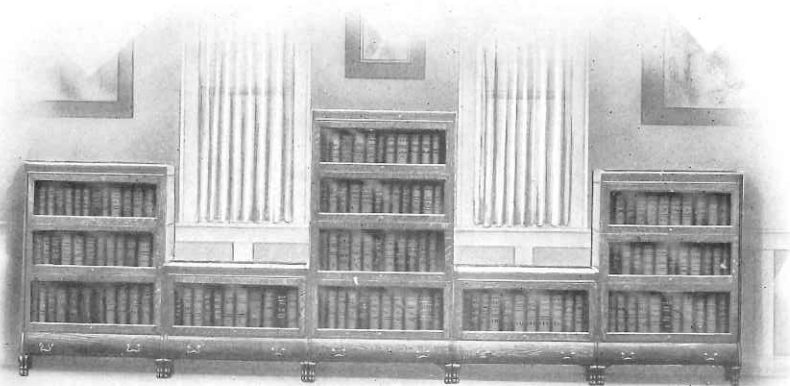

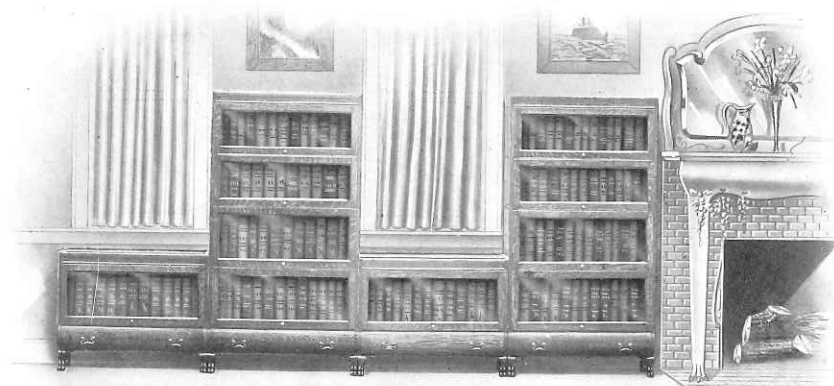

### Perfect Protection for the Books

Each section of The Hale Case has an upper as well as a lower shelf. The door when opened travels over this upper shelf which protects the books and strengthens the case so that each section can be handled when full of books without danger of racking or twisting.

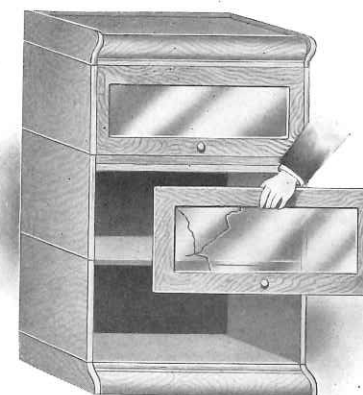

### Dust Proof Case

Every Hale section is absolutely air tight and dust proof. The upper shelf together with the V shaped lower shelf make it impossible for the air to escape. The door when dropped to a closed position compresses the air which prevents slamming or breaking of glass.

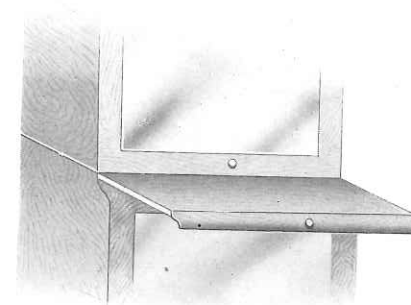

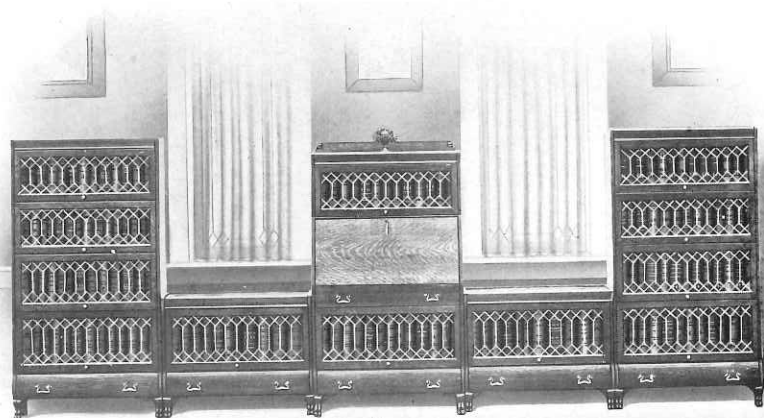

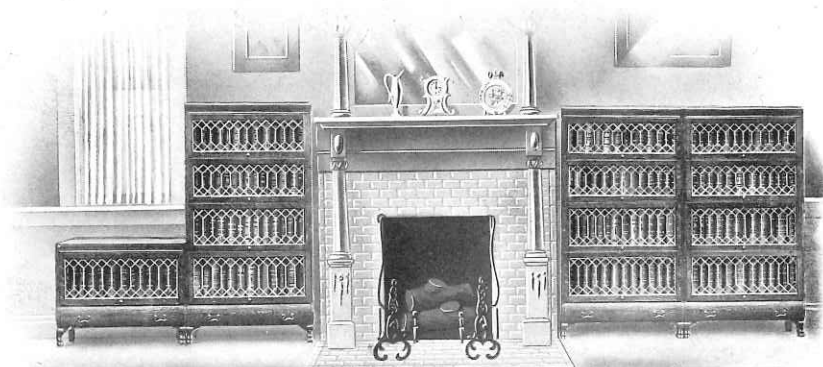

### Perfect Working Door

The door of the Hale Case travels on parallel V-shaped tracks which carry all the weight and strain of the door and as it is wood on wood they are practically noiseless. This door is controlled by a patented non-binding evener which prevents one end going faster than the other. This door can be pushed back from any point and can not stick or bind. This evener is made with rivet joints and there is no friction to rust, wear, grind or rattle.

### The Removable Door

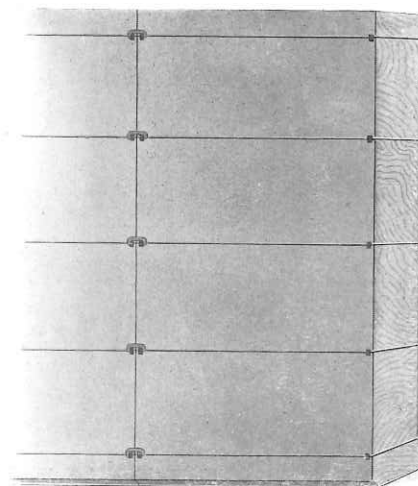

Any of the doors in the Hale Sectional Bookcase may be removed without disturbing the books or taking the case apart. This feature will be greatly appreciated when it is desirable to clean or replace glass.

### The Sliding Reference Shelf

In building up the sectional bookcase it is often desirable to have a deep section at the bottom, and one of lesser depth at the top. We build what we call a reducing section, the bottom of which fits a deep section, and reduces to fit one of lesser depth at the top, as shown in the accompanying illustration.

Every Hale reducing section has a sliding reference shelf which makes a very convenient place for examining books and, when closed, forms a neat moulding between the different depth sections.

### Lateral and Vertical Locking Irons

The dagger irons that lock the cases together vertically are made with right and left hooks at the back of the case. The steel yoke shown in the accompanying illustration fits over the hooks and locks the cases together laterally. This lock is entirely hidden from view; it is very strong and will hold the cases in perfect alignment.

The Hale Bookcase can be started with one section, a crown and a base, and with the outlay of a few dollars at a time the capacity can be increased as the books accumulate. In this way the expense is not felt, and the result is a bookcase that the owner might have hesitated to purchase all at one time.

	<i>Plain Oak</i>	<i>Quartered Oak</i>
1 Crown No. 12 . . . . .	\$1.75	\$2.00

	<hr/> \$9.25	<hr/> \$10.75

*For sizes and grades see pages 30 and 31.*

### **The Sectional is the Only Method for a Growing Library**

The above illustration shows the growth of The Hale Sectional Bookcase. This stack is exactly like the one shown on page 10 with the addition of one No. 1 section.

	<i>Plain Oak</i>	<i>Quartered Oak</i>
1 Crown No. 12 . . . . .	\$1.75	\$2.00
2 Sections No. 1 . . . . .	5.50	6.50

*For sizes and price see pages 30 and 31.*

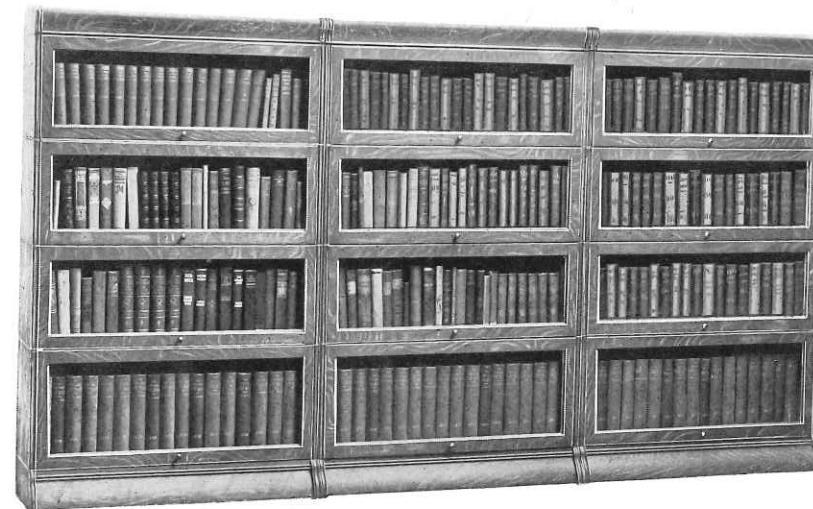

### A Well Proportioned Case for Home or Office Use

The above illustrates the continued growth of the Hale Sectional Bookcase, which is the same case as the one shown on page 11 with the addition of a No. 20 section. This makes a well proportioned case for any home or office.

	Plain Oak	Quartered Oak
1 Crown No. 12 . . . . .	\$1.75	\$2.00
2 Sections No. 1 . . . . .	5.50	6.50
1 Section No. 20 . . . . .	3.00	3.50

1 Base No. 15 . . . . .	1.75	2.00
	<hr/> \$15.00	<hr/> \$17.50

For sizes and price see pages 30 and 31.

### Perfect Alignment

The lateral growth of The Hale Case is limited only by the space to be filled. The above illustrates three stacks similar to the one shown on page 12. When these stacks are locked together laterally by a steel yoke on the back of the case as illustrated on page 9 they become practically a solid case with all the advantages of the sectional system.

	Plain Oak	Quartered Oak

	<hr/> \$45.00	<hr/> \$52.50

For size and price see pages 30 and 31.

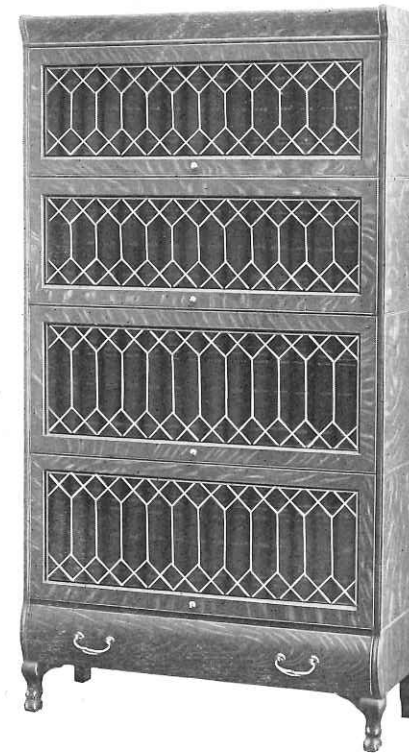

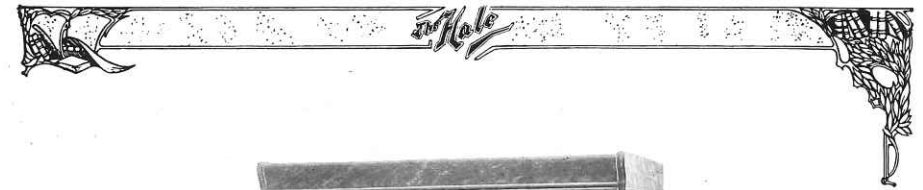

### A Reducing Case with a Sliding Reference Shelf

The reducing section with a sliding reference shelf is an exclusive feature with the Hale system, the convenience of which will be readily appreciated by any one who has had occasion to look up data or references in the old style bookcase where it was necessary to take the books to some table or desk to look them over. This shelf when closed makes a neat moulding between the sections of different depth.

For sizes and prices see pages 30 and 31.

N. Style Leaded Glass.

### The Clawfoot Base

The Clawfoot Base with one long oval drawer is a departure from the old style base, and adds very much to the appearance of the case, besides raising it far enough from the floor to allow sweeping or cleaning underneath.

Add for Leaded Glass \$5.00.

For sizes and price see pages 30 and 31.

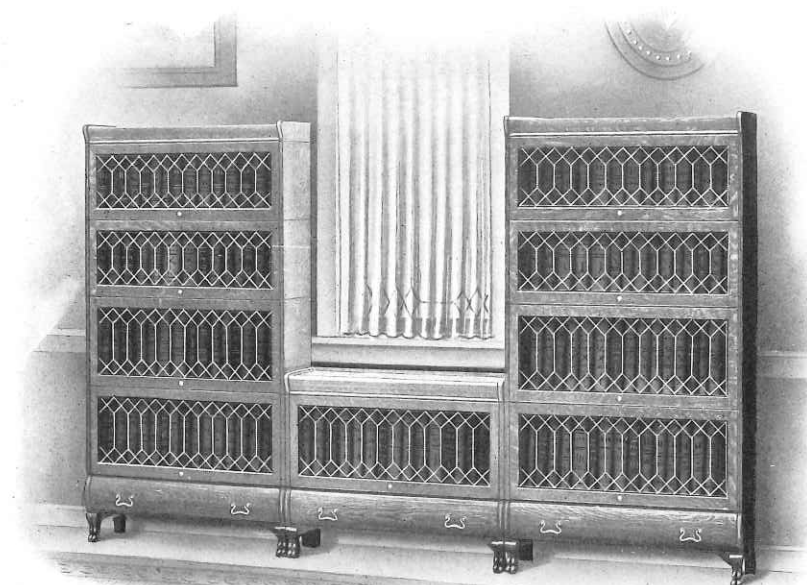

Continually changing conditions of the home and growth of the library make it necessary to have a bookcase that can be arranged to meet these conditions. The Hale Case can be set up so as to be artistic and in keeping with the surroundings no matter how they may change. The leaded glass gives a very pleasing effect, especially in weathered or mahogany cases.

Add for Leaded Glass \$10.00.

For sizes and price see pages 30 and 31.

N. Style Leaded Glass.

Another of the many arrangements that can be made with The Hale Sectional Bookcase to economize space and at the same time give a pleasing effect is the building of a case around a window as shown in the above illustration. The clawfoot base and the N. style leaded glass add much to the beauty of this case. When desired we can furnish a heavy crown for the middle case which will make a good window seat.

For sizes and price see pages 30 and 31.

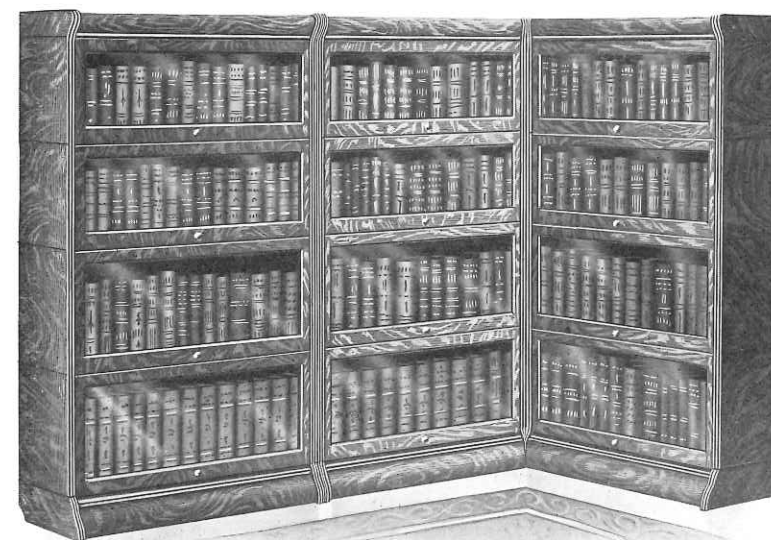

### Outside Corner Cases

The outside corner made of the best material, rubbed and polished, makes a handsome bric-a-brac cabinet and adds much to the possibilities of the Hale system.

*Net Delivered Price of Corner Cases:*

### Inside or Mitered Corner

The inside corner consists simply of a mitered crown and base which we furnish at the price of regular goods. This inside corner, together with the outside corner shown on page 18, makes the possibilities of arranging The Hale Case almost unlimited, and permits the fitting of this case into almost any space desired. The clawfoot base and N. style leaded glass add to the beauty of the case.

**The New No. 24 Desk Section**

The New Hale Desk Section is a combination of book and O. G. drawer sections built in one piece, which can be used as a separate piece of furniture or in combination with other book sections. The writing desk is 5-ply built-up stock,  $32\frac{1}{2}$  x 28 inches and is just the right height when this section is set on a drawer base. The interior is conveniently fitted with pigeon holes and drawers. The long O. G. drawer under the desk measures  $30\frac{1}{2}$  inches long,  $11\frac{1}{2}$  inches wide and 4 inches deep. The book section is  $10\frac{3}{8}$  inches high by  $10\frac{1}{2}$  inches deep.

	Quartered Oak	Mahogany
1 Crown No. 12 . . . . .	\$ 2.00	\$ 2.75
1 Section No. 1 . . . . .	3.25	4.25

1 Base No. 16 $\frac{3}{4}$ . . . . .	4.00	5.50
	<u>\$26.00</u>	<u>\$33.50</u>

For Leaded Glass add \$2.50.

For sizes and price see pages 30 and 31.

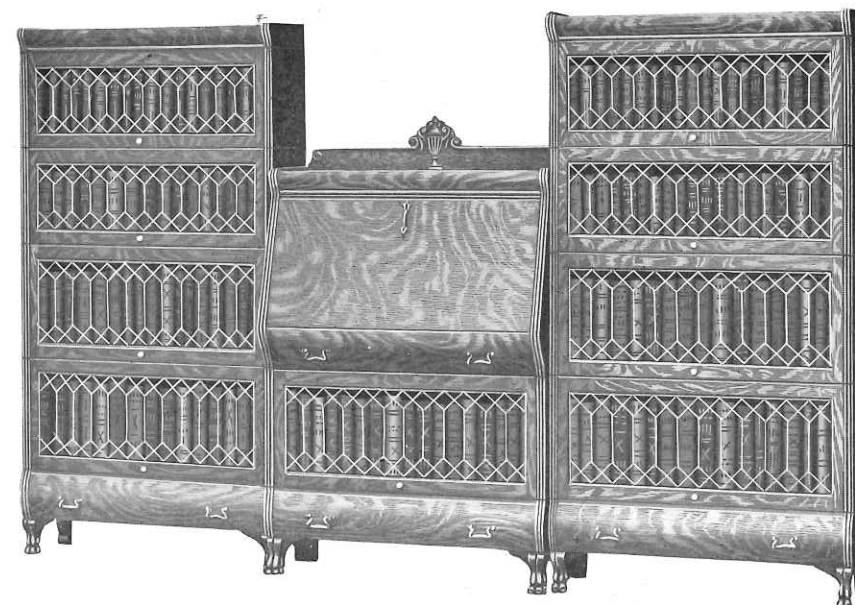

### Combination Bookcase and Desk

The advantages of the sectional combination bookcase and desk over the old style solid combination case will be readily appreciated when you consider that with the sectional system there is no limit to the book space that may be obtained. There is practically no limit to the arrangement and artistic effect to which this case may be adapted.

		Quartered Oak	Mahogany

		\$46.00	\$59.25

For Leaded Glass add \$6.25.

For sizes and price see pages 30 and 31.

How easy it is to move or rearrange The Hale Sectional Bookcase one section at a time without disturbing the books. With this system it is possible to start a library with any of the smaller combinations shown on the previous pages, and by adding a section or two at a time soon have the combination shown on this page. This illustrates the advantages of the sectional system.

The desk used in The Hale System is a separate section and can be built up with book or drawer sections, as desired. The interior is conveniently arranged with pigeon holes and drawers, is made of oak and finished to match the outside of the case. The writing bed is 32 1/2 x 26, and is built of 3-ply stock, with rubbed and polished finish. The desk front is made of the best selected stock, is paneled and fitted with lock and key. The bottom of the desk fits any of the 10 1/2 inch sections and the top any of the 8 1/2 inch sections. It is made in all grades and finishes except Plain Oak.

### For Export

The Hale Sectional Bookcase is made Knock Down for export, and when set up cannot be distinguished from and has all the advantages of the solid case, illustrated on the preceding pages, and is so simple in construction that a child can put it together. There are two hooks in the end of each shelf that are drawn into fasteners in the end of the section by a screw at the back of the case. The tightening of this screw, which is invisible, locks the end and the section together and makes the case when set up as rigid as a solid case. This is the only Knock Down Case in the market that has the following advantages:

- An upper shelf for the protection of books;
- A sliding reference shelf in each reducing section;
- A perfect air cushion door;
- A locking device that makes the section rigid;
- A perfect working door, guided by parallel V tracks;
- A door that can be removed without disturbing the other sections.

Prices and terms the same as on our regular cases.
